

Henna Workshop Permission Slip

Students participating in the workshop will learn the ancient art of henna including how to mix henna paste and apply it to their skin. Henna leaves a temporary stain on the skin for 1-3 weeks. Henna has been used as a safe and temporary method of skin adornment for thousands of years.

Company/Artist uses only 100% natural herbal henna powder, tea, and essential oils (plant essences) to ensure a safe and beautiful henna experience. Although very uncommon, it is possible that some people may have an allergy/intolerance to any natural substance. Please notify us of any known allergies and use common sense.

Company/Artist has never used "black henna" and does not condone the use of this dangerous chemical.

We hope you enjoy your henna for the weeks to come!
